

Why Take A Summer School Course?

There are many great reasons for students at all grade levels to take a summer school course.

Benefits for a current **Grade 8** Student:

- Get a Required Course for your OSSD out of the way
- Allow you to reach ahead and challenge yourself while only taking one course
- Allow you to take an additional Grade 10 course while in grade 9

Benefits for a current **Grade 9** Student:

- Get a Required Course for your OSSD out of the way
- Allow you to reach ahead and challenge yourself while only taking one course
- Open up more elective options in Grade 10

Benefits for a current **Grade 10** Student:

- Allow you to reach ahead and challenge yourself while only taking one course
- Open up more elective options in Grade 11

Benefits for a current **Grade 11** Student:

- Allow you to reach ahead and challenge yourself while only taking one course
- Ability to focus on one course to earn a higher grade
- Open up more elective options in Grade 12
- Reduce the number of Math courses you are taking at once
- Possibility of an additional spare

Course Dates and Hours

Monday, June 22 to Friday, July 17, 2015.
Classes begin at 9:00 a.m. and finish at 4:00 p.m.
A 40-minute lunch break is provided

Summer School

June 22 - July 17, 2015

Crestwood Preparatory College is pleased to offer a number of Ontario Ministry of Education high school credit courses conveniently located in Toronto.

These courses are designed to provide students with an exceptional academic experience in the early part of summer. This schedule allows course completion by mid-July. These dates allow students more time during their summer months to work, attend camp, travel, or vacation with family.

The Ontario credit courses offered are designed for students who are enrolled in CPC or at schools with a calendar which allows the student to start mid-June.

Crestwood Preparatory College Summer School

How to Register:

Complete the application form available from your guidance department or at www.crestwood.on.ca/summerschool and submit it with a copy of the transcript from your home school (if applicable) and all required fees to:

Crestwood Preparatory College

2015 Course Offerings

Advanced Functions 12 (MHF4U)

This course extends students' experience with functions. Students will investigate the properties of polynomial, rational, logarithmic, and trigonometric functions; develop techniques for combining functions; broaden their understanding of rates of change; and develop facility in applying these concepts and skills. Students will also refine their use of the mathematical processes necessary for success in senior mathematics. This course is intended both for students taking the Calculus and Vectors course as a prerequisite for a university program and for those wishing to consolidate their understanding of mathematics before proceeding to any one of a variety of university programs.

Prerequisite: Functions, Grade 11, University Preparation, or Mathematics for College Technology, Grade 12, College Preparation Cooperative Education.

Financial Accounting Fundamentals 11 (BAF3M)

This course introduces students to the fundamental principles and procedures of accounting. Students will develop financial analysis and decision-making skills that will assist them in future studies and/or career opportunities in business. Students will acquire an understanding of accounting for a service and a merchandising business, computerized accounting, financial analysis, and ethics and current issues in accounting.

Canadian History since World War I, 10 (CHC2D)

This course explores social, economic, and political developments and events and their impact on the lives of different groups in Canada since 1914. Students will examine the role of conflict and cooperation in Canadian society, Canada's evolving role within the global community, and the impact of various individuals, organizations, and events on Canadian identity, citizenship, and heritage. They will develop their ability to apply the concepts of historical thinking and the historical inquiry process, including the interpretation and analysis of evidence, when investigating key issues and events in Canadian history since 1914.

Geography of Canada 9 (CGC1D)

This course examines interrelationships within and between Canada's natural and human systems and how these systems interconnect with those in other parts of the world. Students will explore environmental, economic, and social geographic issues relating to topics such as transportation options, energy choices, and urban development. Students will apply the concepts of geographic thinking and the geographic inquiry process, including spatial technologies, to investigate various geographic issues and to develop possible approaches for making Canada a more sustainable place in which to live.
